
QP-FDM 20mA 1200w Electrostatic electret equipment for melt blown fabric

QP-FDM 20mA 1200w Electrostatic Electret Equipment For Melt Blown Fabric

QP-FDM series high-voltage power supply is a high-voltage power supply developed by our company. The power supply is mainly for electrostatic electret, electrostatic dedusting, electrostatic spinning, electrostatic spraying and other factories and scientific research experiments. The power supply is simple to operate, convenient to install, and has complete protection circuit, which is suitable for harsh working environment.
